ROUND 03 / CONTROL RULES

Control Rules - Read Before the Market Opens

Field

Thirteen teams participate. Each team may maintain no more than three active browser sessions. The three sessions may be used for games, auctions, or both.

Station ownership

ADMIN01 runs Table 1, ADMIN02 runs Table 2, continuing through ADMIN08 at Table 8. Record any emergency handoff in the incident log.

Player handoff

A team selects one member, receives an available table, reaches the laptop, and presses Send code. A random three-digit code then appears on both the team device and that table laptop. The admin confirms the person before starting the 75-second timer.

Question exhaustion

A question is permanently consumed when the assignment is created, even if the reservation is cancelled or expires. Never erase a Used mark and never move a consumed question to another team.

Cooldown

The team cannot immediately return to its last completed table. The same player must complete two other tables, win or loss, before returning to an earlier table.

Scoring

Correct answer: add the table's configured points. Wrong answer or timeout: zero. Auction winning bids are deducted. Corrections require a written reason and super-admin initials.

Qualification

The super admin chooses the qualifying count from 1 to 13. A tie across the cutoff must be resolved openly before the field is locked.

ROUND 03 / LIVE RECORD

Incident, Network and Manual Recovery Log

When to use

Record laptop failure, duplicate reservation, lost network, wrong-player start, disputed answer, timer mismatch, emergency admin handoff or manual point correction.

Do not guess

If the system state is uncertain, pause that station, preserve the device screen, note the clock time and ask the super admin to reconcile before awarding points.
