30 MINUTES · 13 TEAMS · AUCTION + PUZZLE FLOOR

THE UNDERGROUND EXCHANGE.

Three devices. Eight puzzle stations. One live clue auction.
Choose your moves carefully—every point can change the final field.

1 Use up to 3 logins

Your team may keep a maximum of three active devices. Use them for puzzle runs, the auction, or a mix of both.

2 Choose the player

Before a run, select the member who will play. That choice controls the personal table cooldown.

3 Receive a table

The system assigns an available station. Go only to that table and keep your team screen ready.

4 Send the 3-digit code

Press Send code when you reach the laptop. The same code appears only on your device and that station screen.

5 Solve in 75 seconds

The station starts after identity confirmation. Enter one final answer before time ends. Correct earns that table's points; wrong or timeout earns zero.

6 Bid while you play

Clue tokens can appear at any time. Winning bids are deducted from your balance, so spend only when the information is worth it.

MORE SOLVED RUNS = MORE POINTS · SMARTER BIDS = MORE OPTIONS

READ BEFORE ROUND 3 OPENS

PLAY FAST.
PLAY FAIR.

If a laptop, timer or network fails: stop, keep the screen visible, and call an organiser. Do not refresh repeatedly or start another run until the issue is recorded.

01 DEVICE LIMIT	Only three active team sessions are allowed. Closing a tab may take a short time to release the slot; always use Log out when switching devices.
02 ONE PLAYER, ONE RUN	Select the real player before requesting a table. Show the team screen to the station admin. Do not share or guess access codes.
03 TABLE COOLDOWN	A team cannot immediately repeat its last completed table. A player may return to the same table only after completing two other station runs—win or loss.
04 QUESTION IS FINAL	Once a station assigns a question, it is consumed and will never be used again. Cancelling or missing the reservation does not restore it.
05 ANSWER WINDOW	You receive 75 seconds after the admin confirms the code. Submit carefully: spelling, format and accepted alternatives are checked by the system.
06 POINTS	Correct station answers add the displayed reward. Wrong answers and timeouts add zero. Auction wins deduct the final bid. Your team alone can view its balance and history.
07 AUCTION	Bids must be within your available balance. A bid is serious and cannot be withdrawn. Only the winning team receives that clue token after the lot closes.
08 ROUND 4 GATE	The super admin will announce the number of teams advancing. Final balance determines the provisional field; a tie at the cutoff is resolved before results are locked. Preserve the secret code collected across earlier rounds.
